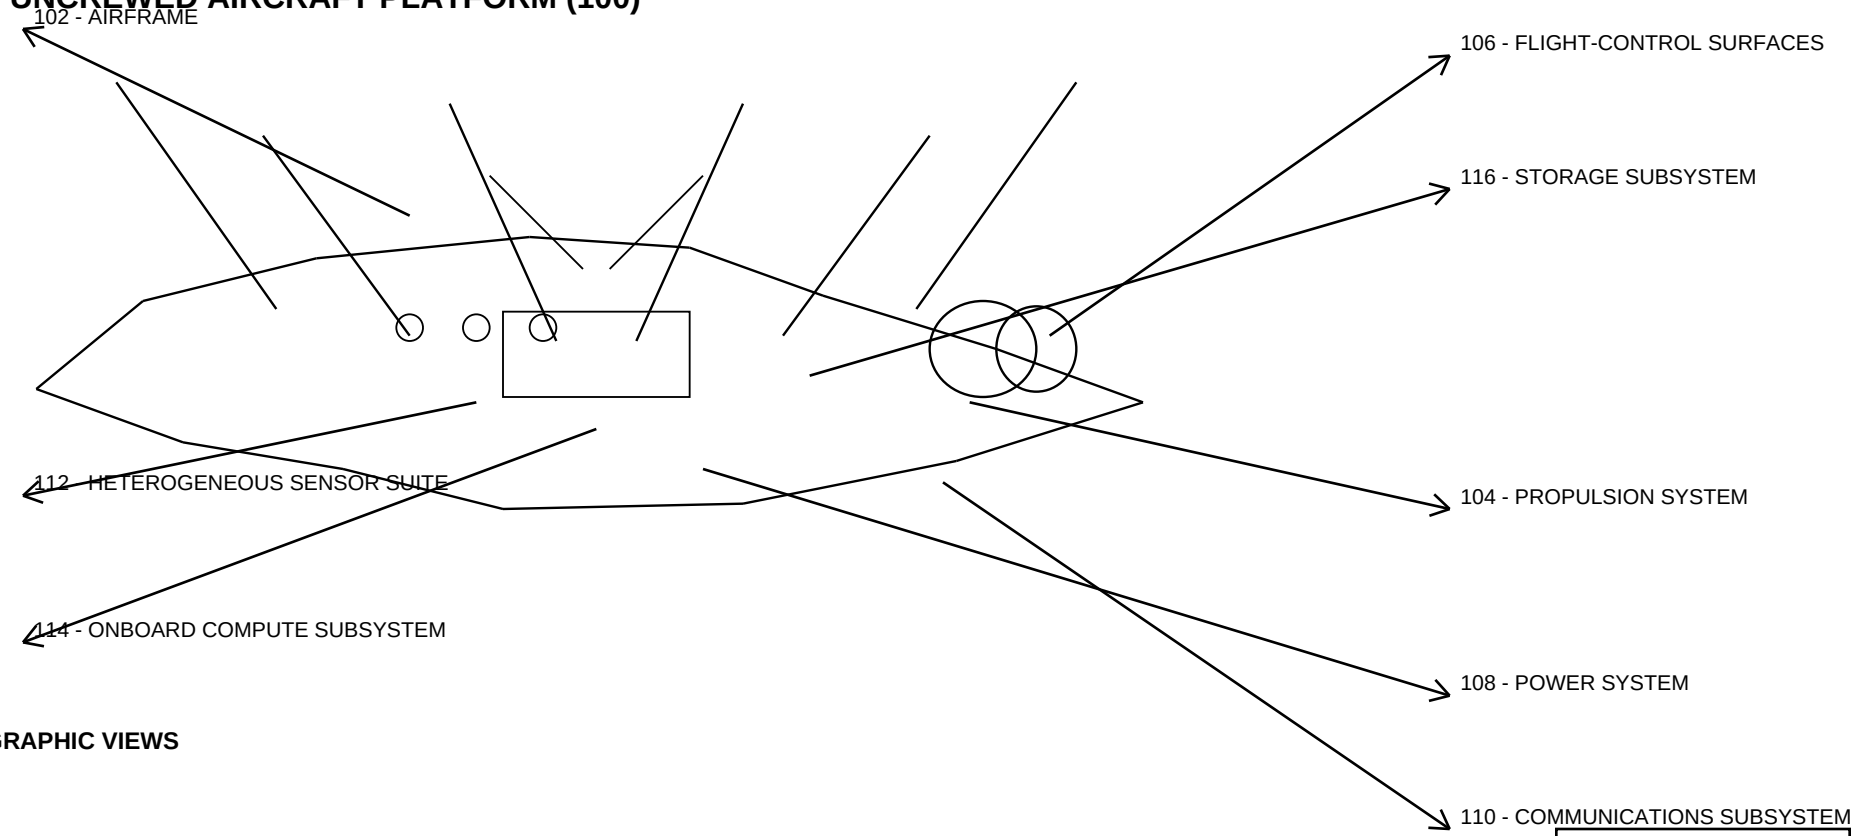
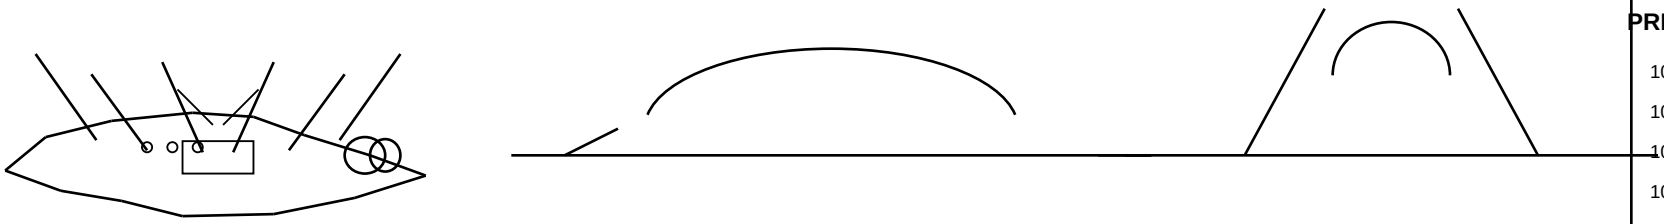
FIG. 1 - UNCREWED AIRCRAFT PLATFORM (100)



ORTHOGRAPHIC VIEWS



TOP VIEW **SIDE VIEW** **FRONT VIEW**

PRINCIPAL SUBSYSTEMS

100 Aircraft
102 Airframe
104 Propulsion
106 Flight-control surfaces
108 Power system
110 Communications
112 Sensor suite
114 Onboard compute
116 Storage

Patent drawing - no scale intended

FIG. 2 - ONBOARD AUTONOMY AND COMPUTE ARCHITECTURE

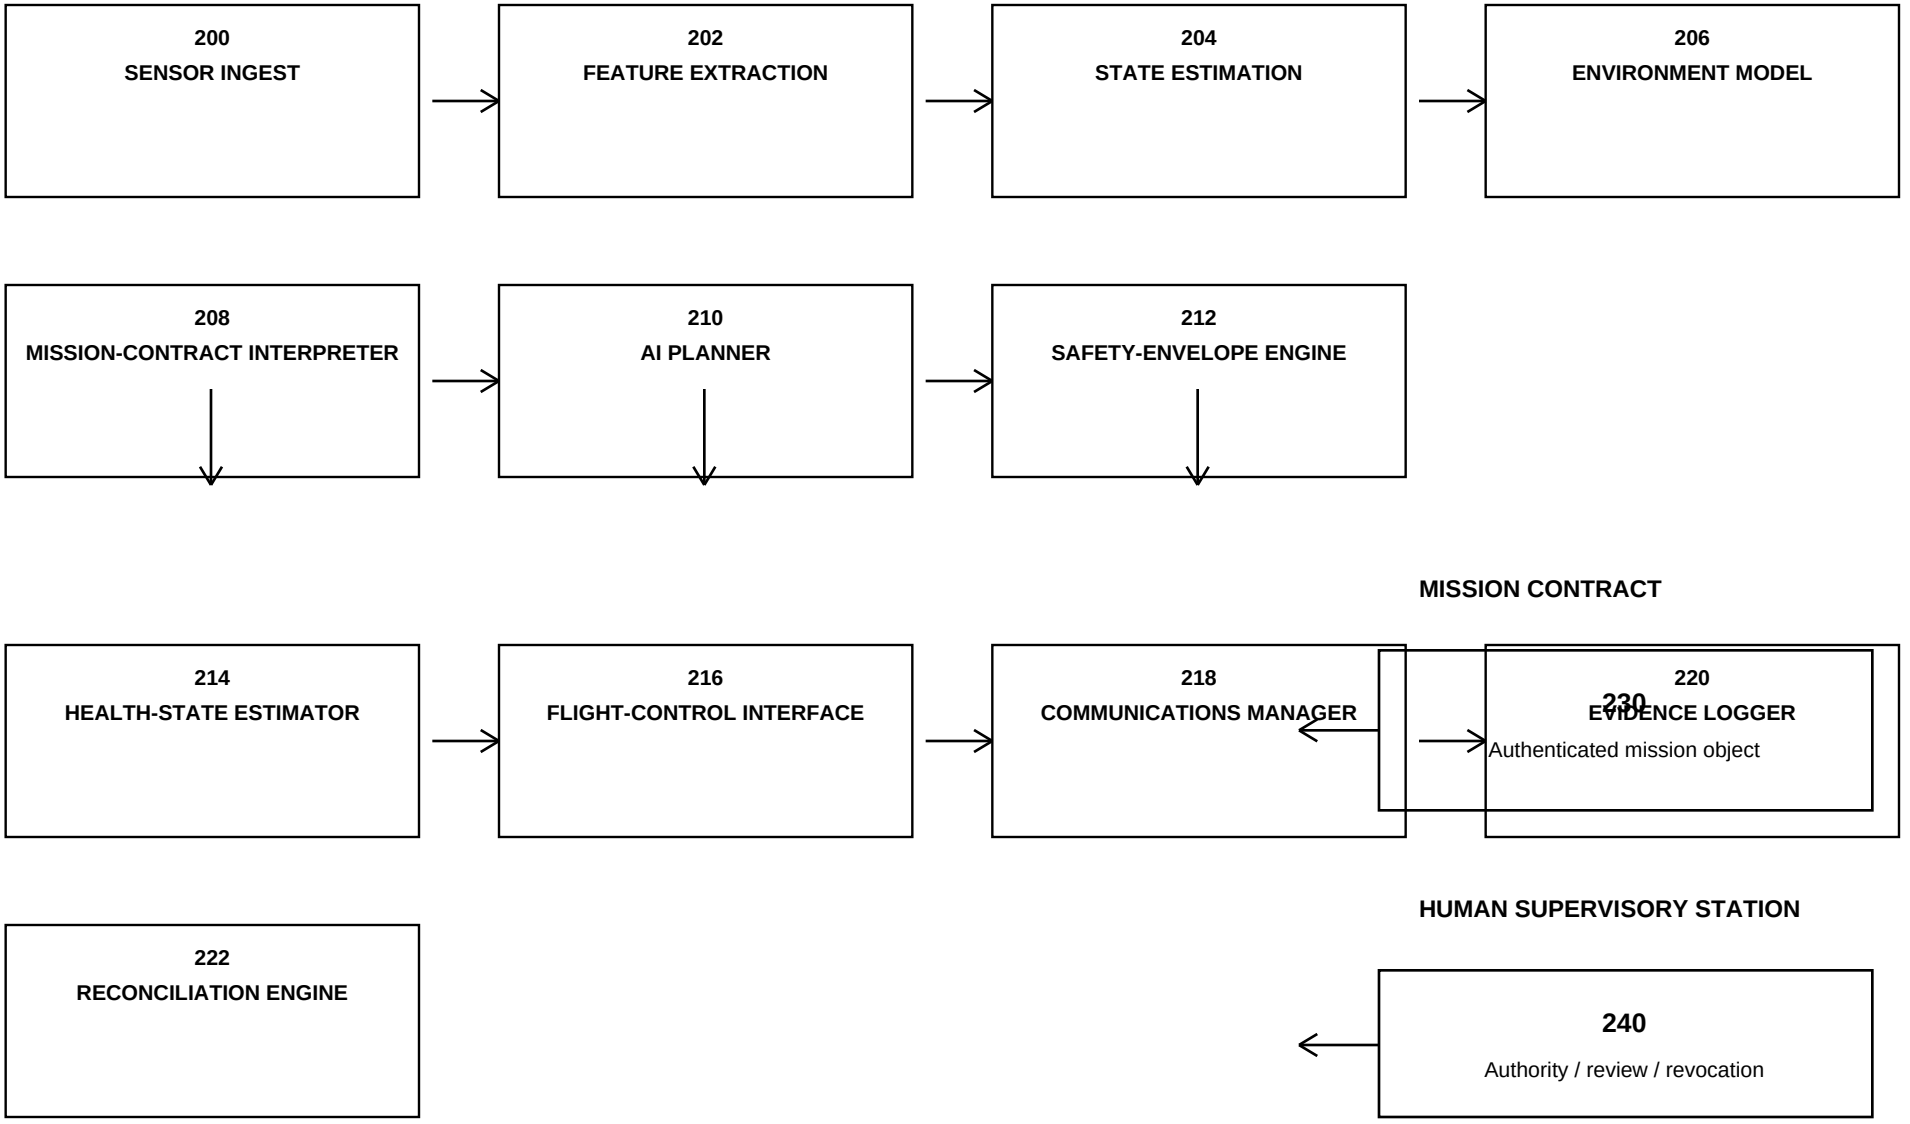


FIG. 3 - CONFIDENCE-AWARE SENSOR FUSION AND ENVIRONMENT UNCERTAINTY

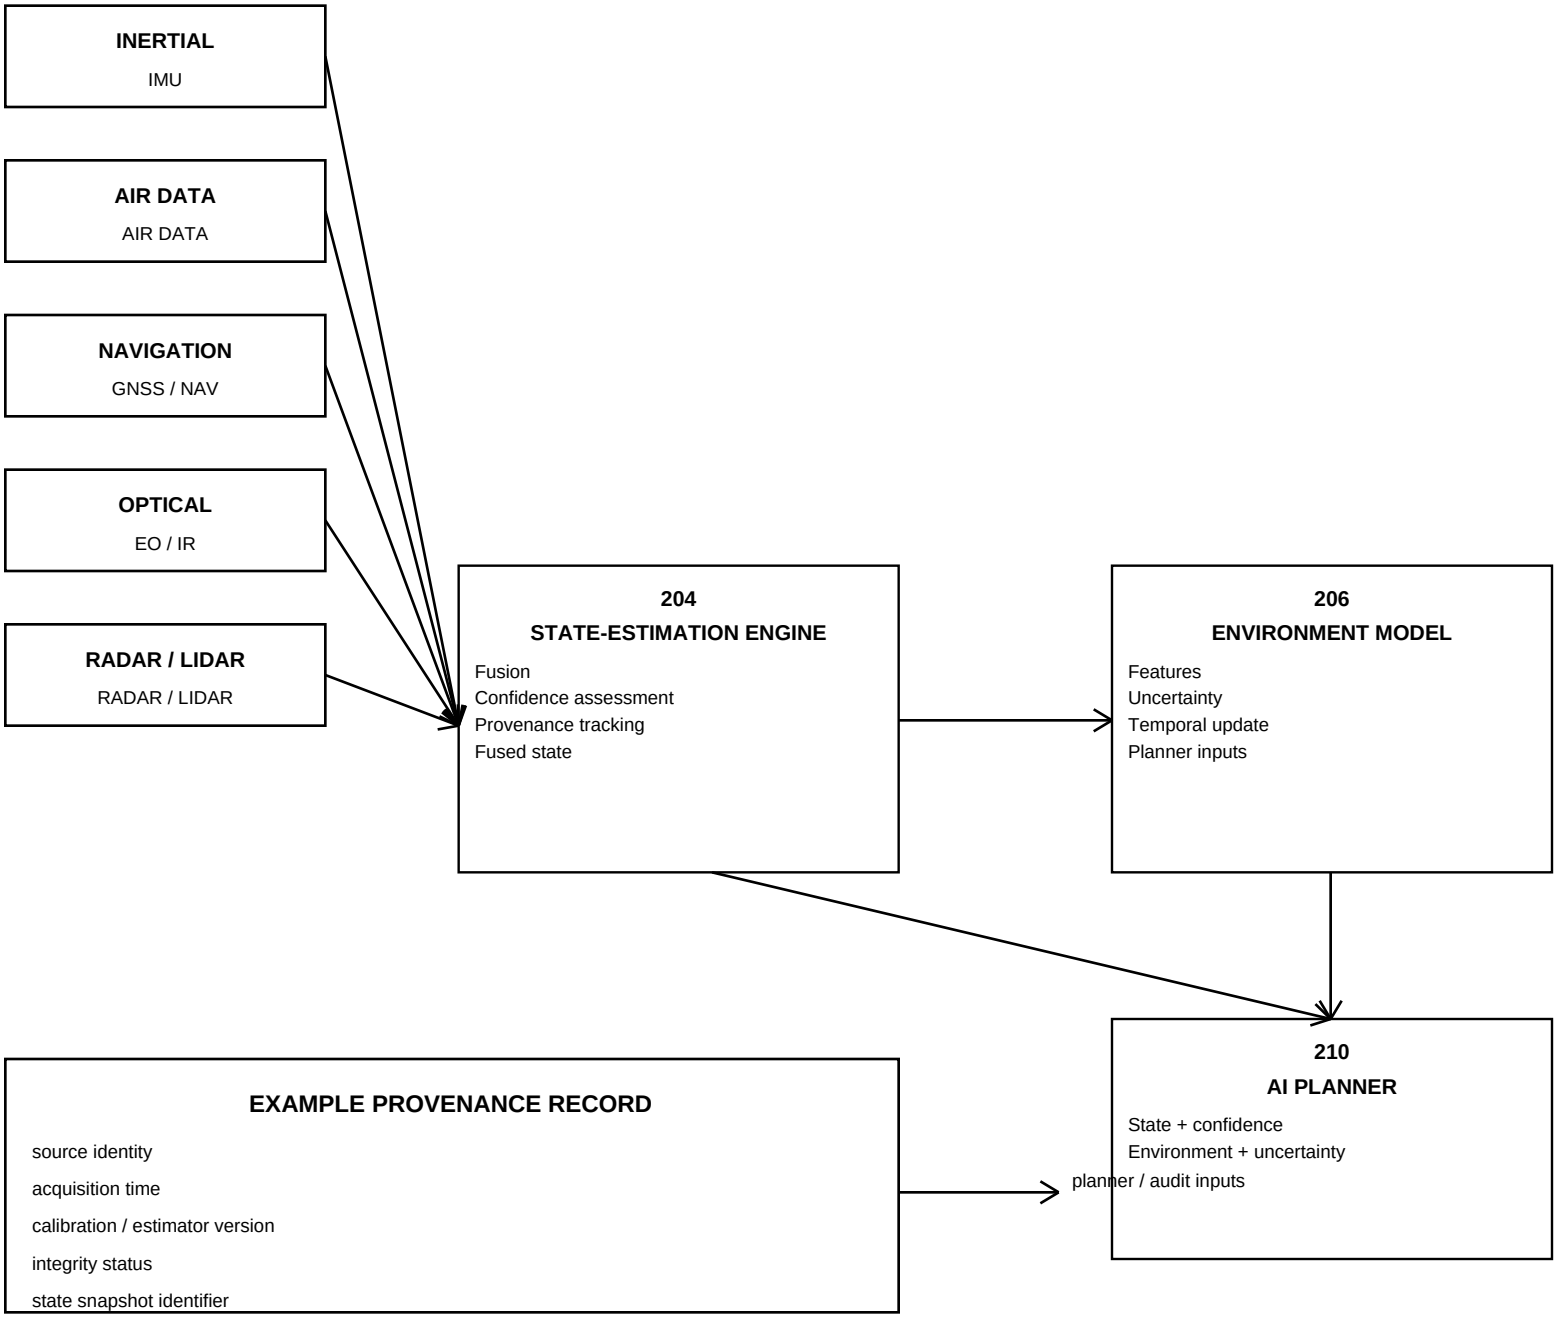

FIG. 4 - AI PLANNING WITH DETERMINISTIC SAFETY GATING

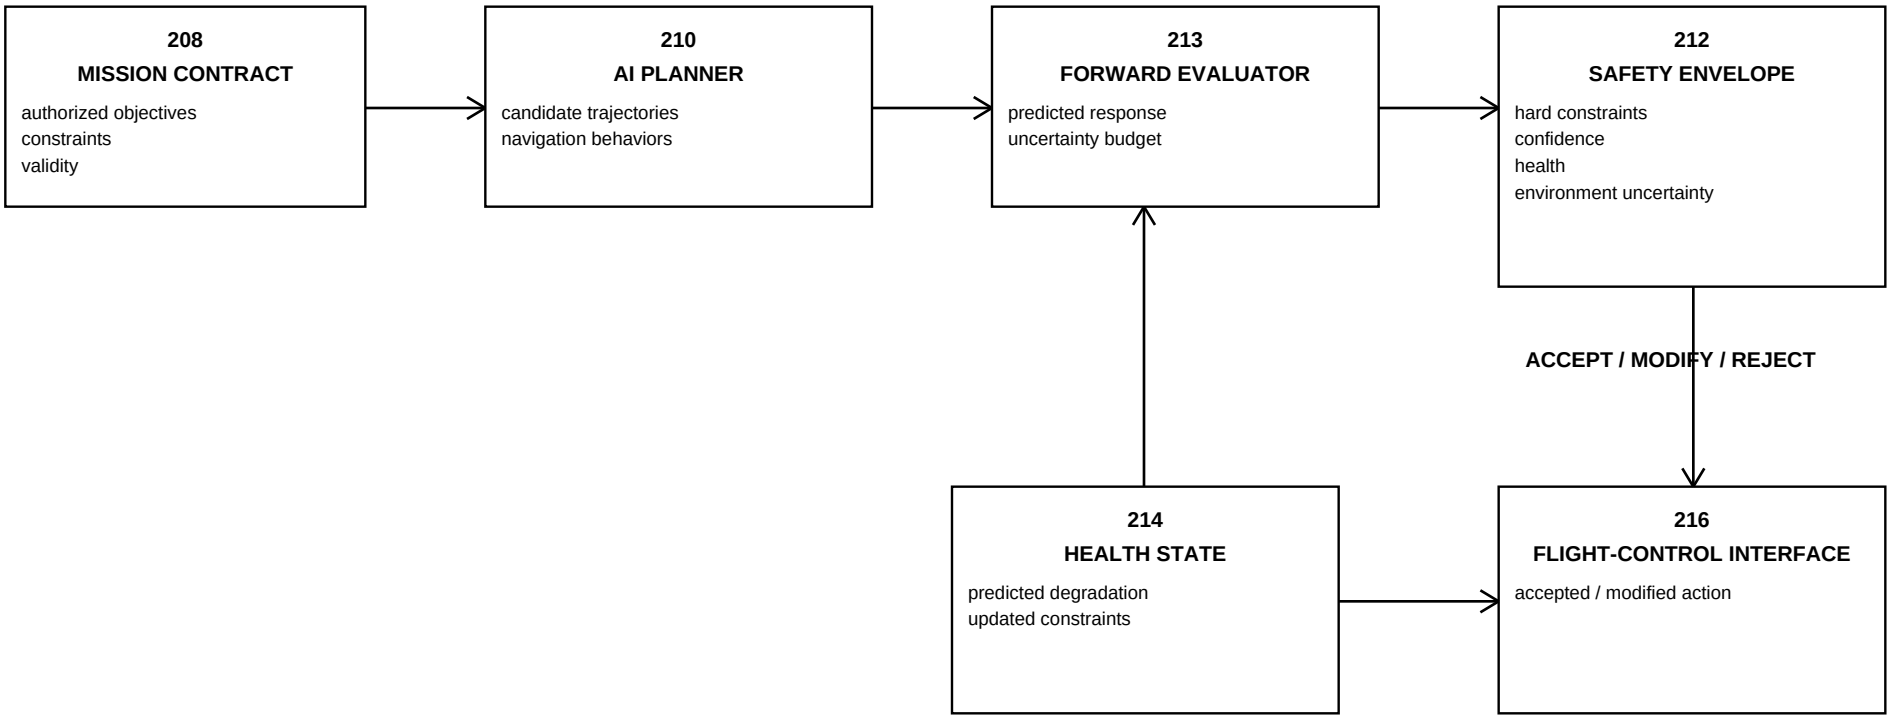

FIG. 5 - HEALTH-AWARE FLIGHT RECONFIGURATION

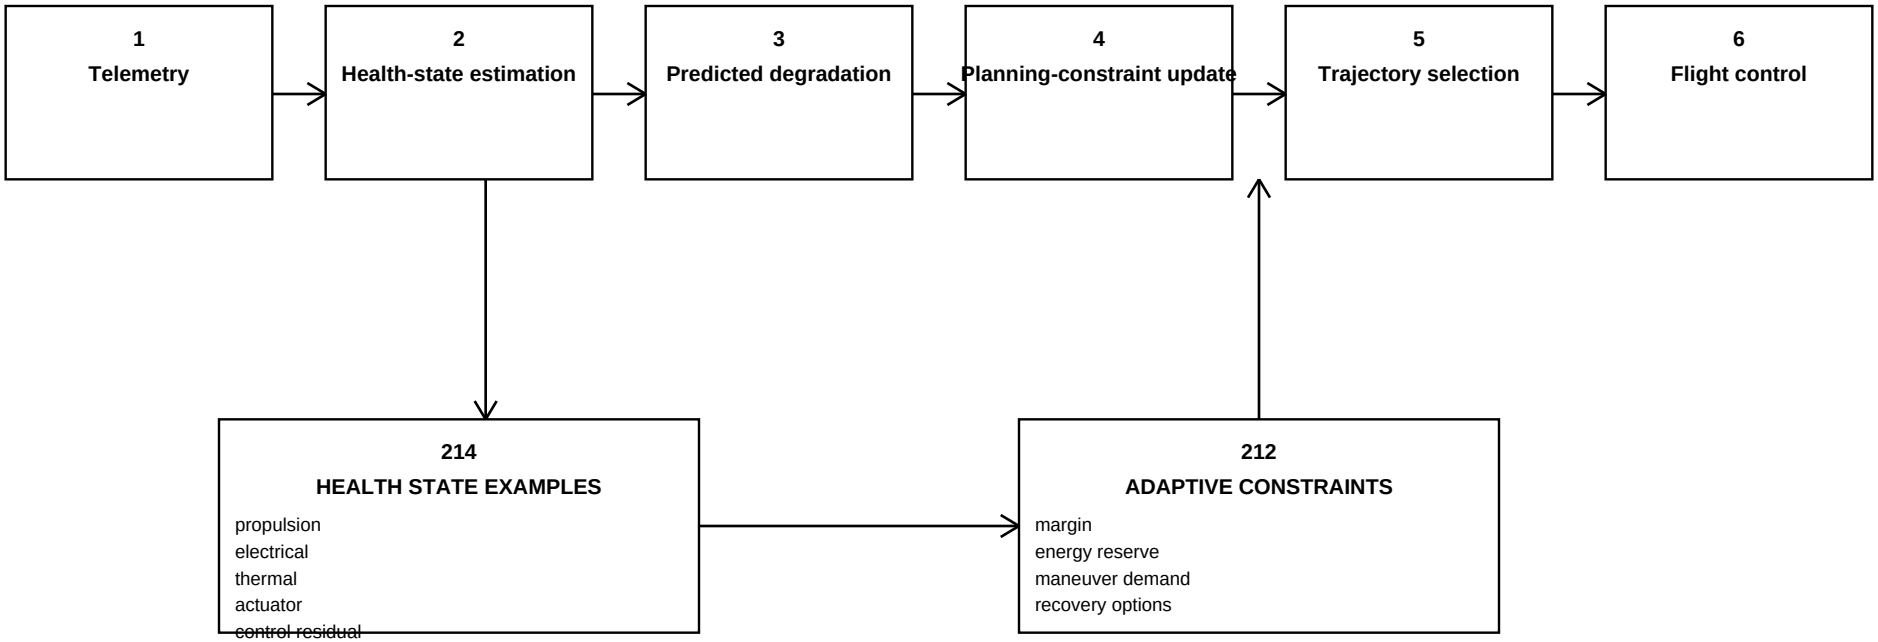
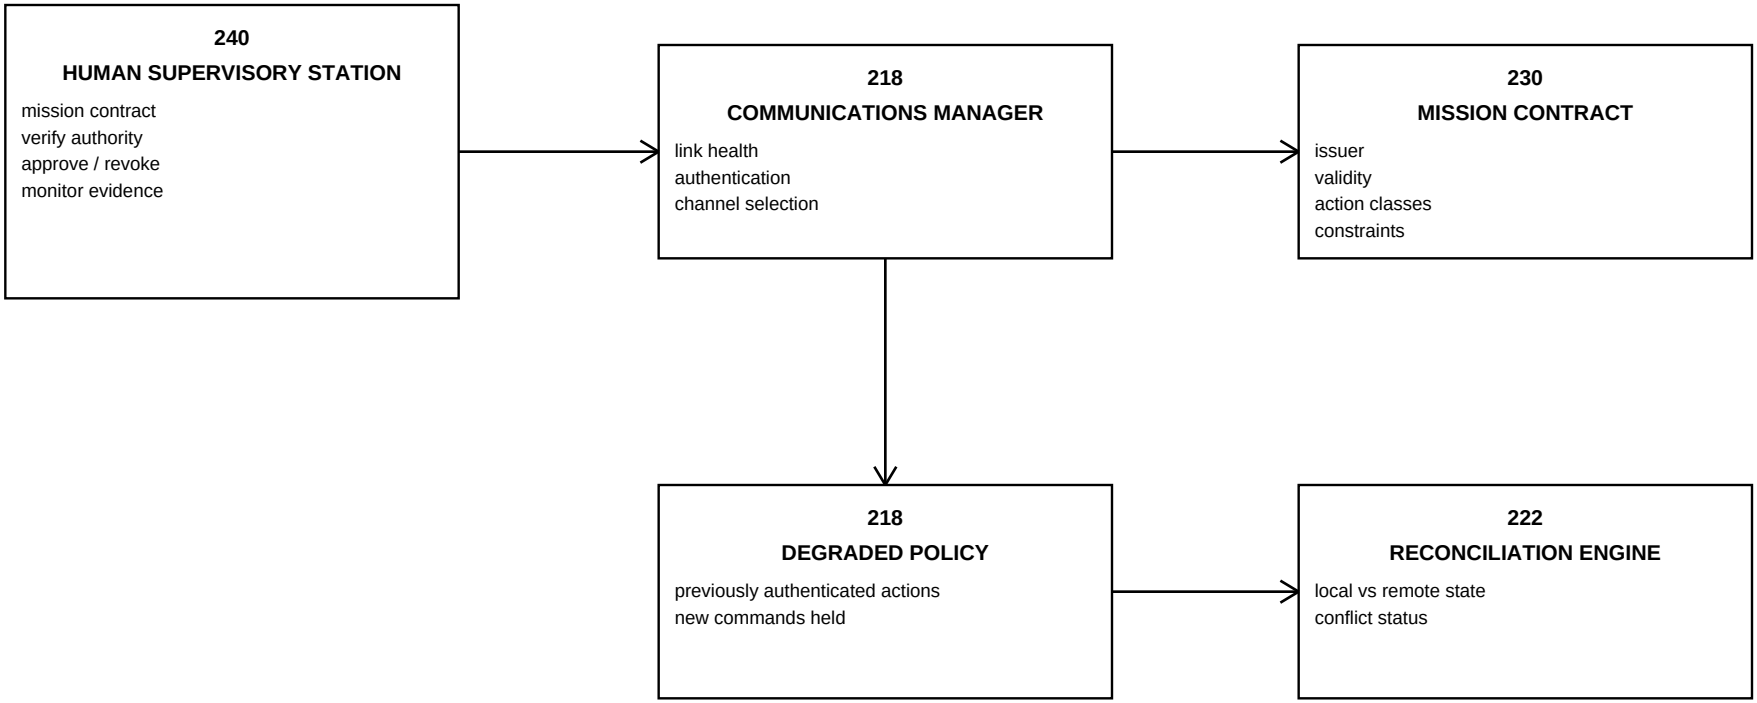


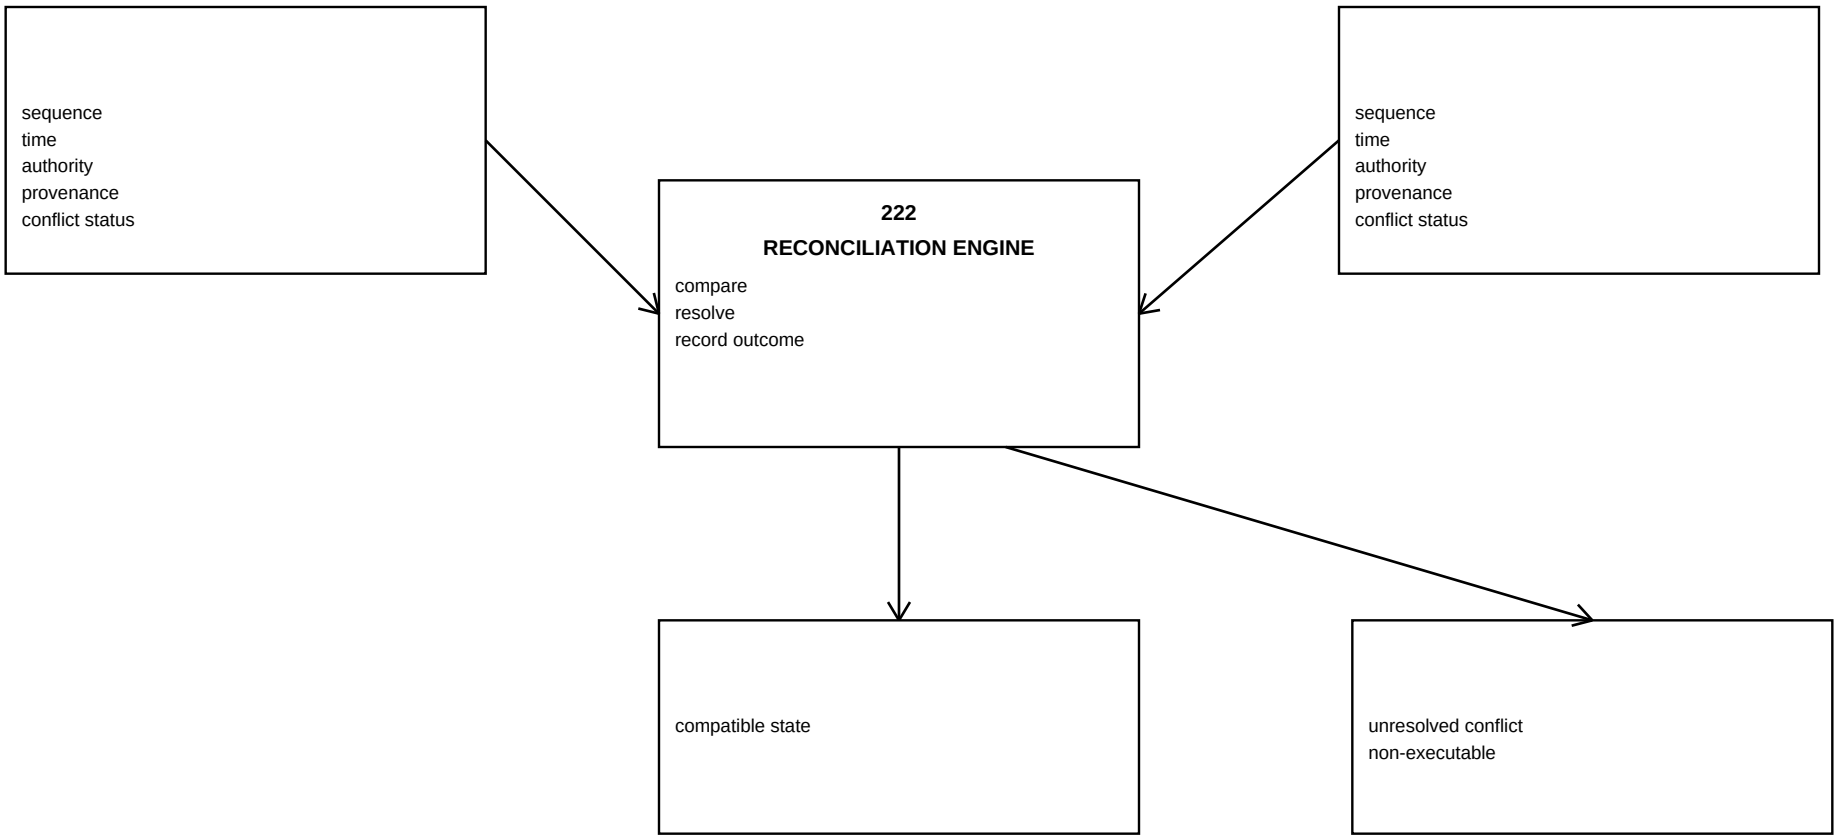
Predicted health information changes constraints before a new trajectory is selected.

FIG. 6 - AUTHENTICATED HUMAN SUPERVISION AND RESILIENT COMMUNICATIONS



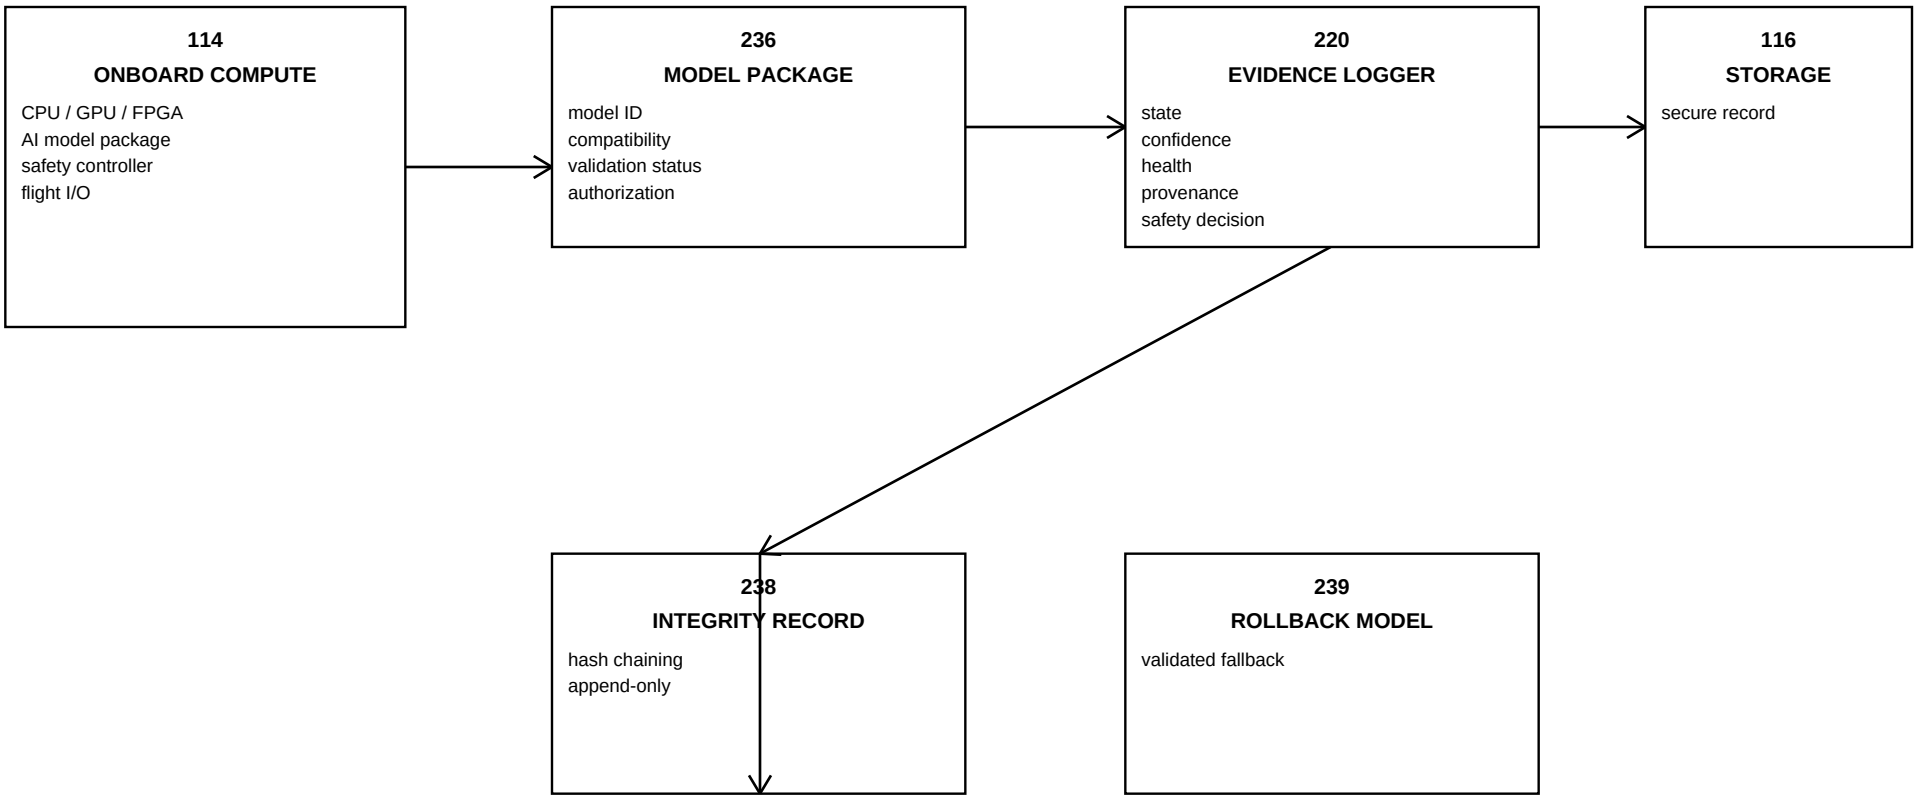
When link integrity degrades, the platform can restrict executable behavior while preserving state for later reconciliation.

FIG. 7 - MISSION-STATE RECONCILIATION



Authority policy may cause revocation to supersede stale commands.

FIG. 8 - ONBOARD COMPUTE, MODEL LIFECYCLE, AND EVIDENCE LOGGING



Evidence can support later reconstruction of candidate actions and safety outcomes.

No retention of every raw sensor sample is required by this embodiment.
